

N-RESERVATIONS

Hotel booking reservation platform

What is n-Reservations?

n-Reservations is an ultra modern, state of the art, flexible and surprisingly modular reservation platform. It has a superb architecture, excellent error control systems and offers surprisingly flexible and dynamic relationship management between Site manager, Hotels and customers who intend to make reservations.

Software specification

n-Reservations is built using HTML, CSS, JavaScript, PHP and MySQL on linux. This platform can also be hosted under windows, if required.

Who is it for?

n-Reservations can be used by:-

- Hotel / Group of hotels
- Travel agents

What does it comprises of?

n-Reservations comes with a travel portal / website and a admin control panel. The portal is designed by our extremely experienced staff who understands the industry and the needs of the market. Our designs are fresh and they come with most modern tools on any travel portals.

Software features

Website and the admin panel have following features:-
